

October 11, 2017

Two days ago our foster coordinator was called to the shelter to come pick up some bottle babies. When she got there she saw a cute little boy in the vet room. They said he was in rough shape and in need of a hernia surgery, so she grabbed him thinking it was an easy fix.

His name is now **Warner**. He is estimated to be 6-8 years old. After she got him home we realized the extent of his issues. And now we are heartbroken for our little old man.

He has eye infections and ear infections. He needs 40-50% of his teeth pulled and has gum disease. His skin has a terrible yeast infection and possibly a strep infection.

But those are just the minor issues.

He has an inguinal hernia that needs a specialized surgeon, and possibly a luxating patella. We can't know more until his skin and teeth are taken care of; they'll be able to take clearer x-rays when he's knocked out. There are too many risks at his age to do everything in one surgery, so he will have to undergo multiple surgeries.

Until he is infection free we just have to wait.

In the last 2 days he has been poked, pulled and prodded, and the entire time has never put up a fight. He's on 12 different medications. We know he's in pain, but he doesn't show it. He gives his foster momma kisses when he gets scared. He is the absolute sweetest boy we've ever met.

So now, we are begging for our followers to donate to our fundraiser. Warner will cost us thousands of dollars, but we believe he is worth every penny.

We ask that you donate to our "Strut Your Mutt" because every dollar goes straight to us. And if we raise enough money, Best Friends Animal Society will give us a huge bonus.

Please help us save Warner. We know he is worth it.
